FEBRUARY 2002

MOLECULAR CONCEPTOR™ OFFICIALLY LAUNCHED AT THE 67TH ANNUAL MEETING OF THE ISRAEL CHEMICAL SOCIETY

Molecular Conceptor™ attracted considerable attention at the annual meeting of the Israel Chemical Society held at the Renaissance Hotel - Jerusalem on January 29-30. A number of specialists of the private and public sectors visited the Synergix booth discovering the new drug design CD.

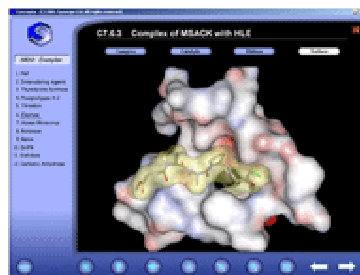

CEO CLAUDE COHEN LECTURED ON: « Selected Examples in Rational Drug Design »

“...Synergix is using an engineering approach to the creation of new lead molecules that is based on rational drug design technologies...” Cohen said.

The presentation used **Molecular Conceptor**™, the first multimedia

courseware developed by Synergix to teach drug design principles.

Examples of molecular mimicry, peptidomimetism and others exploiting the structural features of the biological target proteins were presented to illustrate the power of such technologies in **Drug Discovery**.

Molecular Conceptor™ GOES VOCAL

The English sound version will be available to the scientific community worldwide in March 2002.
